Eugene Paul Wigner Papers, circa 1930s-1980s (bulk circa 1930s-1970s): Finding Aid

Summary Information

Call number:	C0742
Location:	Princeton University Library. Department of Rare Books and Special Collections. Manuscripts Division. One Washington Road Princeton, New Jersey 08544 USA
Size:	49.7 linear feet (115 archival boxes, 1 carton, 1 oversize box, 1 card file)
Language(s) of material:	English.
Abstract:	Consists of the papers of Hungarian-born, Nobel Prize-winning physicist Eugene Wigner, and includes correspondence, subject files, writings, and offprints reflecting his long career in physics.

Biography of Eugene Wigner

A Hungarian-born physicist, Wigner worked in the early 1930s as a professor at the Technische Hochschule in Berlin, where he studied the quantum mechanical interpretation of atomic spectra which resulted in the publication of his book *Gruppentheorie und Ihre Anwendung auf die Quantenmechanik Der Atomspektren* (1931), later translated and published as *Group Theory* (1951), now a classic in its field. He moved to the United States, where he became professor of mathematical physics at Princeton University from 1933 to 1937 and from 1937 to 1938 at the University of Wisconsin; he then returned to Princeton, where he worked until 1971, becoming professor emeritus. Prior to World War II, Wigner, along with Leo Szilard and Albert Einstein, was instrumental in getting the United States government to investigate the use of atomic energy for military purposes. During the War, he was on the staff of the Metallurgical Laboratory at the University of Chicago (the Manhattan Project) researching ways to produce an atomic bomb, and he helped design the nuclear reactor at Hanford, Wash., where plutonium was produced. He was a member of the general advisory committee for the U.S. Atomic Energy Commission (1952-1957, 1959-1964) and director of the Civil Defense Research Project at Oak Ridge, Tenn. (1964-1965), reflecting his interests in civil defense and national security. He received the Enrico Fermi Award (1958) and the Max Planck Medal (1961), and in 1963 he was awarded the Nobel Prize for Physics.

Description

The collection consists of the papers of Wigner, including correspondence, subject files, writings, and offprints reflecting his long career in physics. While some of the material concerns his work in the early 1930s as a professor at the Technische Hochschule in Berlin, the bulk of the papers relate to the period after Wigner moved to the United States. There is correspondence with other physicists and scientists, such as John von Neumann, Pascual Jordan, Werner Heisenberg, Leo Szilard, Glenn T. Seaborg, Frederick Seitz, and Alvin M. Weinberg, as well as correspondence relating to his receipt of the Enrico Fermi Award, the Max Planck Medal, and the Nobel Prize for Physics. Additionally, there are 15 cassettes of taped interviews with Wigner discussing his entire life, conducted by Andrew Szanton from 1988 to 1989. Most of the papers and correspondence are in English; however, there is some material in German or Hungarian.

In addition, there are two sets of typewritten lectures on "Solid State" delivered at Princeton University. The first (138 pp.), dating from the 1930s, contains autograph notes by Frederick Seitz. The second set of lectures (181 pp.) is titled "Theory of Solid State" and was delivered at Princeton University between 1948 and 1949.

Series 6: Andrew Szanton/Wigner Interview Tapes, 1988-1989

Series 7: Documents

Series 8: Amelia Frank Material

Series 9: Papers of Others

Series 10: Printed Matter

Series 11: Oversize Material

Series 12: Additional Material

Access and Use

Access

Collection is open for research use.

Restrictions on Use and Copyright Information

Single photocopies may be made for research purposes. No further photoduplication of copies of material in the collection can be made when Princeton University Library does not own the original. Permission to publish material from the collection must be requested from the Associate University Librarian for Rare Books and Special Collections. The library has no information on the status of literary rights in the collection and researchers are responsible for determining any questions of copyright.

Acquisition and Appraisal

Custodial History

The papers came directly to the Library from Wigner's campus office at Princeton University.

Processing and Other Information

Preferred Citation

Identification of specific item; Date (if known); Eugene Paul Wigner Papers, Box and Folder Number; Department of Rare Books and Special Collections, Princeton University Library.

Encoding

Machine-readable finding aid encoded in EAD 2002 by Techbooks, Cristela García-Spitz, and Amy E. Amrstrong on June 22, 2007. Created from MARC record via MarcEdit and XSL stylesheets in 2007.

Descriptive Rules Used

Finding aid content adheres to that prescribed by *Describing Archives: A Content Standard*.

Subject Headings

These materials have been indexed in the [Princeton University Library online catalog](#) using the following terms. Those seeking related materials should search under these terms.

- Hanford Nuclear Reservation.

Miscellaneous (Offprints, Xeroxed articles, reports, newsletters, etc.)	113	1
Published Books (of Wigner, translations of his work, others)	114	

Series 11: Oversize Material

<u>TITLE</u>	<u>BOX</u>
Photograph of 1969-1970 Princeton physics faculty (?), including Wigner	115

Series 12: Additional Material

<u>TITLE</u>	<u>BOX</u>	<u>FOLDER</u>
Papers received from Arthur S. Wightman, co-editor of <i>The Collected Works of Eugene Paul Wigner</i> (Berlin, N.Y.: Springer-Verlag, 1992) [AM 1999-53 and AM 2003-21]	115	
Photocopies/transcripts of 7 articles by Wigner in Hungarian and English and other papers:	115	
Are Quantum Mechanics and Relativity Theory Consistent? 1986	116	1
Bitter and Consoling Reminiscence, 1966	116	2
Contributions to the Theory of the Neutron, 1932	116	3
A Conversation with Eugene Wigner, 1972/73 (by István Kardos)	116	4
My Remembrances of My School, undated	116	5
The New Theory of Chemical Bond, circa 1929	116	6
The Statistics of Composite Systems According to the New Quantum Mechanics, 1928	116	7

Series 12: Additional Material ... (Continued)

Hámos, György: "An Eminent Student from the High School of Fásor" 1973, English & Hungarian transcripts	116	8
Fifth International Wigner Symposium, 1997: poster, Y. S. Kim, organizer	116	9
Photographs: Miscellaneous (5)	116	10
"Publications of Eugene P. Wigner," (Annotated list, photocopy, 48 pp. [Wightman's copy]; an earlier version, 41 pp., and a supplementary list (1989-90), prepared by Wigner and Wightman)	116	11
Baron, Junius G. - 1 ALS, 1972, by Wigner to Baron, 1 AL (photostat, incomplete), by Baron to Wigner, 1972, both in Hungarian, with English translations and notes by Andrew Lenard. [AM 2001-39] (See also: box 24, folder 9)	116	12
Various articles/public statements (9) by Wigner (mostly relating to civil defense), and one article by Leo Szilard [AM 2003-21]	116	13
"Solid State", 1930s] TMs copy (138 pp.) of a lecture series delivered at Princeton University, with autograph notes by Frederick Seitz. AM 1993-35. [See also: box 24, folder 9]	117	1
"Theory of the Solid State", 1948-1949 TMs copy (181 pp.) of a lecture series delivered at Princeton University. AM 1993-35. [See also: box 24, folder 9]	117	1
